Internship Offer Letter

Student Name	:	**Deepak Kumar**
Stream	:	**B.Tech**
Branch	:	**CSE**
Institute Name	:	**IILM University, Greater Noida**
Internship Domain	:	**Google AI-ML**
Internship Duration	:	**June - August 2026**
AICTE Student ID	:	**STU69988986a6e9a1771604358**

We are pleased to inform you that you have been selected for the **10-Week AICTE – EduSkills Virtual Internship Program.**

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a week-wise structured learning plan.
- You will be required to complete weekly assessments to track your progress and understanding.
- Certain modules will require submission of project documentation and assignments.
- In the final week, you must appear for a Final Assessment Test.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate.**

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
week 1	Program neural networks with TensorFlow	Everything you need to know to demystify machine learning, from the first principles in the new programming paradigm to creating convolutional neural networks for advanced image recognition and classification that solve common computer-vision problems.
week 2	Get started with object detection	Basics of object detection and how to integrate a pretrained object detector into your mobile app.
week 3	Go further with object detection	Train your own custom object-detection models using TensorFlow Lite and the TensorFlow Lite Model Maker library, and build on all the skills you gained in the Get started with object detection pathway.
week 4	Get started with product image search	Build a product image search feature for a mobile app using on-device Object Detection.
week 5	Get started with product image search	Detect objects in static images and live camera feeds on Android to build a visual product search.
week 6	Go further with product image search	Build and call a product image search backend from a mobile app, enhancing the product search feature you built in the Get started with product image search pathway.
week 7	Go further with image classification	Build custom image-classification models and improve the skills you gained in the Get started with image classification pathway.
week 8	Go further with image classification	Create a custom image classifier model and integrate it into your app.
week 9	Assessment	Assessment
week 10	Final Credential Validation	Final Credential Validation

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
